Professional Experience

Internship Full-Stack Developer @ NTTDATA

Mar 2022 - Jun 2022 // Murcia, Spain

- Internship developing different supervised projects built with Angular, Java, Jenkins, SpringBoot, Ionic, Postman, Bootstrap and Angular Material.

Interesting Projects

Autocars Servicemur @ Dealer Cars Web App

Next Js, Strapi, Tailwind CSS, MongoDB, Heroku, Vercel

- Web App built for a customer to have all his cars in the same place.
- Front-End with Next Js, for the dynamic routing, fetching data from the API of Strapi with server-side props for the home carousel or usual fetching.
- Back-End with Strapi headless CMS where I have created different collections of JSON Objects for the features of the cars, like being able to have a discount or feature a vehicle, all of these with a MongoDB database.

autocarservicemur 

Plugin Whatsapp @ +300 downloads in NPM

Javascript, CSS

- It recreates a Whatsapp chat that redirects to your real Whatsapp.
- I made it customizable via a javascript object where you can change its position, all the texts, the profile picture and phone.
- I have tested it in React Js, Next Js and vanilla Javascript.

npmjs.com/package/vanilla-whatsapp 

Worth Mentioning

- I am working with a friend Senior in Angular, developing an e-commerce app with Node Js, Angular Js, SASS and MongoDB.
 - One of the features I did was about making a service that calls different methods in a Utils class for getting the zip of all the products of our supplier, unzipping it, handling all the exceptions of the CSV with all the products, parsing it to JSON, create an instance of the product class that implements an interface to ensure everything is right and then insert them in the MongoDB database.

Languages

Spanish: Native

English: ~ Advanced

Driving Licenses

 B  A2

Date of Birth: 12 Jan 1996

Nationality: Spanish

Gender: Male

Skills

Programming Languages

JavaScript, Typescript, HTML, CSS, PHP, Java.

Libraries & Frameworks

React Js, Next Js, Angular Js, Alpine Js, Laravel, Tailwind CSS.

Tools & Platforms

Docker, Git, Wordpress, MongoDB, MySQL.

Education

IES Ingeniero De La Cierva

2020 - 2022 // Murcia, Spain

2 years Vocational Training in Web Development.

Final Degree Project we developed an employee exchange web app for the Highschool between six classmates built with Laravel 9, Alpine.js, Livewire, Tailwind, MySQL, Nginx and Docker.

Awards

Informatics Olympics

Murcia 2012

First place in Murcia, Spain at projects modality. We built a website with PHP where you can play a game online. We did it between a friend and I.

Interests

Computers in general, Cooking, Technology, Swimming, Gym, Astronomy, Tennis, Guitar, Chess, Traveling.
